

## G5 2 HEAD BLINDER

G5 2 Head Blinder is a high-performance and intelligent LED dual eye audience light that uses a five color mixed light system (RGBA+WW) and supports multiple DMX channel modes. It is suitable for various front and back lighting scenes such as stage performances, studios, theaters, conference halls, etc. The device is equipped with a 1.3-inch OLED high-definition display screen, which supports switching between Chinese and English interfaces, with clear operation logic and both professionalism and ease of use.

### Key features:

- Support independent control of RGBA, and warm white colors
- 60 color paper effects, quickly achieve stage color atmosphere
- Color temperature adjustable from 2000K to 10000K
- Support screen lock and password unlock
- 1.3-inch OLED high-definition display screen
- Linear/Square/Inverse Square/S-line four dimming curves
- Fan automatic/silent/off/full power mode

### Application:

- Mobile performance
- Theater
- Stage
- Studio
