

ZAP ONE

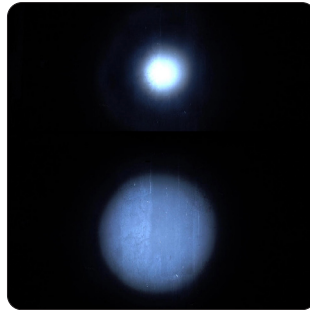

ZAP ONE uses 150W high brightness RGBL four-color LED as its core, supplemented by 24 high brightness RGB color light beads, with a total power of 200W, and has both main lighting and auxiliary atmosphere rendering capabilities. Supports 19 ° -27 ° electric zoom and built-in continuous dynamic zoom pulse effect, allowing for flexible switching between spotlight and narrow beam output modes. The product is suitable for various scenarios such as professional stages, performing arts events, and fixed installations.

Key features:

- 150W RGBL four-color light source, plus 24 RGB light beads as auxiliary
- Ultra wide electric zoom+dynamic pulse
- Zoom range 19 ° -27 °
- Linear dimming, no flicker
- 20CH/36CH/108CH/20aCH, with a maximum of 108 channels that can achieve independent control of each LED bead
- Support RDM remote device management

Application:

- Mobile performance
- Theater
- Stage
- KTV

Technical Data

Power supply: AC100-240V, 50/60Hz

LED: 150W

Color: RGBL

Power connection: Power in & out

Signal connection: 3-pin XLR in & out

Control channels: 20CH/36CH/108CH/20aCH

Control mode: DMX512, Self driving, voice control, master-slave RDM

Housing: Colour black

N.W.: 4.4kg

Environment: IP65
